Verbs tell us about the time of action.

She *plays* football every day.

Meenu *went* shopping yesterday.

Aquib *will* go to the museum tomorrow.

## Simple Present Tense

The verbs that tell us about actions that take place regularly are in the simple present tense.

Rajinder *wakes up* at 6 a.m. every day.

Bipin's father *prepares* breakfast every morning.

Julia *goes* for a walk with her grandmother.

General facts or things that are always true are expressed in the simple present tense.

The sun *rises* in the east.

The sun and the moon *give* us light.

## Let's Play Grammar

### 1. True or false?

Your teacher will ask each of you to come to the front of the class by turns. You have to make three statements in the present tense about one of your classmates. The rest of the class will guess if the statements are true or not.

Examples:

- Atul plays football very well.
- Shreya loves to sing.
- David is often late to school.

### 2. Guess the action!

Your teacher will divide the class into two teams. A student from one of the teams comes to the front of the class and picks a chit from a box. The chits have names of actions written on them. The student then has sixty seconds to act out the action or situation while the other team members have another sixty seconds to guess what it is by saying a sentence in the present continuous tense. For example, say, if Smita from Team A mimes the action of riding a bicycle, the other team members have to guess it by saying:

Smita is riding a bicycle.

Each team gets one point for guessing an action correctly within the given time. To score a point, the sentence must be grammatically correct. After ten rounds, the team with a higher score is the winner.
